Product engineer who builds end to end: backend first, then frontend, then smart contracts, and now AI. I've shipped my own products to thousands of users, won hackathons, earned grants, and contributed to 38 open-source projects. I build products for people I care about, and I love helping others get started in tech.

| 116 | 38 | $8K+ | 2,000+ | $5K |

## Projects

**Dev3pack platform** · product engineer — **Present**

Dev3pack is a global AI & Web3 fellowship where women + students learn, build and ship together. I help build the platform, the bootcamps and the hackathons.

- Built the **Dev3pack Global Hackathon app** (38 merged pull requests).

AI · Web3 · Platform · dev3pack.xyz · hack.dev3pack.xyz

**Delulu** · founder & engineer — **2025 – present**

A habit contract: people put money, or just their word, on a goal they care about, and AI checks their photo proof so they actually keep it.

- Grew to **2,000+ users**.
- Awarded a **$5,000 grant from Celo** (2025). Live on Celo mainnet, accepting cUSD.
- Selected for the **GoodDollar builder community** for two seasons (season 3 and season 4), funded as we build.

**Bunkie** · founder & engineer — **2026**

Verified shared rooms for corps members in Abuja, so they leave camp with a safe place to stay and a roommate they can trust.

Product · Full stack · bunkie.xyz

**Stellar Wrap** · creator & maintainer — **2026**

A “Spotify Wrapped” for the Stellar network: it turns a wallet's raw on-chain history (transactions, contract deployments, NFT buys) into a beautiful, shareable monthly story.

- Open source, with **179 forks** and **280+ pull requests** reviewed and closed from contributors.
- Soroban smart contract (Rust) that stores non-transferable wrap records per wallet.

Stellar · Soroban · Rust · TypeScript · stellar-wrap-frontend.vercel.app

**CeloPact Protocol** · creator — **2026**

Open-source milestone escrow for AI agents on Celo: a requester locks USDT per deliverable, an agent submits the work, an oracle checks quality, and payment releases instantly.

- **Live on Celo mainnet**, with ERC-8004 agent identity and a dispute fallback.
- Ships as an **SDK on npm** (celopact-sdk) with docs and worked examples.

## More projects

**Lemon** · creator — 2026

An AI dating agent on Celo.

AI agents · Celo · lemon-mauve-pi.vercel.app

**Open source** · Diamond contributor, OnlyDust — 2024 – 2025

**116 merged pull requests across 38 projects** in the Ethereum, Starknet, Stellar and Optimism ecosystems, earning **$8,000+**.

app.onlydust.com/users/zintarh/overview

**Coloniz** · engineer at Horus Labs — 2024

Joined the Horus Labs team after winning their Starknet hackathon, and built Coloniz together with the team.

Web3 · Starknet

**Nigerian Air Force website** · freelance — 2020

Built as part of freelance government work while studying.

## Open-source contributions

**Tokenbound on Starknet** · Horus Labs
28 merged PRs across the SDK, ConnectKit, ConnectKit Bridge, iframe and explorer.
github.com/horuslabsio/tokenbound-sdk

**Shinigami** · StarkWare Bitcoin
A Bitcoin Script VM written in Cairo. github.com/starkware-bitcoin/shinigami

**Starknet Quest** · LFG Labs
The on-chain quest platform of Starknet. starknet.quest

**Keep Starknet Strange** · StarkWare
Joyboy (decentralised social on Nostr + Starknet), art/peace and Starknet Phone. art-peace.net

**Scaffold-Stark & Starknet Scaffold**
Open-source dev stacks for building Starknet dApps.
github.com/Scaffold-Stark

**StarkFinder, Mediolano, Troves, Konoha**
AI agent, programmable IP, DeFi and DAO governance on Starknet. mediolano.app · starkfinder.xyz

## Hackathons

**Starknet Tokenbound hackathon, hosted by Horus Labs** · winner, $750 — 2024

**Hackathon in Accra, Ghana** · first runner-up, $2,000+ team prize — 2024

**nHub Nigeria hackathon, Jos** · winner, ₦30,000 — 2019

## Experience

**Dev3pack** · product engineer — Present

**Horus Labs** · engineer — 2024

**Blockheader Kaduna** · learned Web3, now a tutor — 2024

**Zeroes & Ones Technology** — 2022

**Jamborow (UK), Ashinity (Nigeria)** — 2021

Laravel backend engineer, then React.

## Education & community

**BSc Computer Science** — 2025

Studied and worked side by side.

**Devconnect Buenos Aires** · volunteer — 2025

**Tutor** · nHub Nigeria, Blockheader Kaduna, ColabKD — 2020 –

**Speaker** · tech events

**GDG on Campus** · volunteer — 2020

## Skills

Backend (Laravel) · Frontend (React) · Smart contracts (Solidity, Starknet, Celo) · AI-powered products · Product engineering, from idea to shipped
